III. PROFESSIONAL EXPERIENCE

Microsoft Corp.

Distinguished Engineer 2023 – Present

- As the manager of IC3-AI, I lead a team of applied scientists and engineers within the Intelligent Conversation and Communications Cloud (IC3) division of Office. We apply AI to enhance call quality and reliability, as well as to create innovative user experiences. Our technology is used by hundreds of millions of users worldwide, and our AI models ship in Teams, Skype, Windows, Azure, and Xbox.

Partner Applied Scientist 2014 – 2023

- As the manager of IC3-AI, I lead a team of applied scientists and engineers within the Intelligent Conversation and Communications Cloud (IC3) division of Office. We apply AI to enhance call quality and reliability, as well as to create innovative user experiences. Our technology is used by hundreds of millions of users worldwide, and our AI models ship in Teams, Skype, Windows, Azure, and Xbox.

Principal Architect 2005 - 2014

- As an Audio/Video Architect for Skype/Lync, I focused on enhancing the quality of AV calls. I led a team of data scientists and machine learning experts to achieve this goal. Additionally, I oversaw the AV certification team, ensuring that devices are fully compatible with Skype/Lync for optimal performance. Products shipped include Lync, Skype, Microsoft RoundTable, Video Kinect, and Polycom CX300.

System Architect 2003 - 2005

- I started the incubation of the RoundTable product, transforming it from a research project to a shipping product. My responsibilities included writing the business plan, fundraising, camera design, video processing, acoustics, active speaker detection, audio quality, and industrial design. I also managed the RoundTable IP strategy and successfully filed over 30 patents related to the product.

Researcher 2000 - 2003

- As a researcher at Microsoft Research, I developed innovative hardware and software technologies to enhance communication, including meeting room recording and teleconferencing. I initiated the RingCam project, which ultimately led to the RoundTable product. My research expertise includes omnidirectional video, camera calibration, sound source localization, and event detection.
